

IN THE CLAIMS

1 1. (canceled)

2 2. (canceled)

1 3. (currently amended) A golf teaching aid comprising:

2 a first golf glove, having a first attachment feature on a glove surface area
3 above a top of a thumb of a first hand inserted into said first golf glove and having a
4 lengthwise elongated first location feature disposed on a glove surface area above a
5 palm surface of said first hand inserted into said first golf glove, said first location
6 feature extending lengthwise from below a base of a little finger of said first hand
7 laterally to a position on the palm surface below a base of a thumb of said first hand
8 said first location feature positioned for locating a shaft of [[said]]a golf club to said
9 palm surface of said first hand for a correct grip when said golfer grips said golf club
10 by placing said shaft of said golf club onto said first location feature; and

11 a second golf glove having a second attachment feature on a glove surface
12 area above the palm surface of a second hand inserted into said second golf glove,
13 wherein said first attachment feature couples to said second attachment feature when
14 said second hand inserted in said second golf glove overlays said first hand inserted in
15 said first golf glove ~~while~~ when correctly gripping [[a]]said golf club.

1 4. (original) The golf teaching aid of claim 3, wherein said first golf glove has a
2 third attachment feature disposed on a glove surface area above and adjacent to a top
3 surface of said index finger of said first hand when inserted into said first golf glove,

4 said third attachment feature having a first portion extending a lengthwise
5 distance from a first point to a second point on said top surface of said index finger of
6 said first hand and a second portion extending a lengthwise distance from a third
7 point to a fourth point on a side surface of said index finger of said first hand, wherein

8 said first point is adjacent to a junction between said index finger and a middle
9 finger of said first hand, said second point is substantially at a middle knuckle of said
10 index finger of said first hand, said third point is adjacent to said middle finger and
11 adjacent to said junction between said index finger and said middle finger of said first
12 hand, and said fourth point is substantially at said middle knuckle of said index
13 finger.

1 5. (currently amended) The golf teaching aid of claim 4, wherein said second golf
2 glove has a fourth attachment feature disposed on a glove surface area above and
3 adjacent to a palm surface of a little finger of said second hand inserted into said
4 second golf glove,

5 said fourth attachment feature having a first portion extending a lengthwise
6 distance from a first point to a second point on said palm surface of said little finger
7 and a second portion extending a lengthwise distance from a third point to a fourth
8 point on a side surface of said little finger adjacent to said ring finger, wherein

9 said first point adjacent to a junction between said little finger and a ring
10 finger of the second hand, said second point past a middle knuckle but not to a tip
11 area beyond a last knuckle of said little finger, said third point is adjacent to said
12 junction between said little finger and said ring finger of the second hand, and said
13 fourth point is past said middle knuckle but not to said tip area beyond said last
14 knuckle of said little finger.

1 6. (original) The golf teaching aid of claim 5, wherein said third attachment feature
2 couples to and is retained by said fourth attachment feature when said little finger
3 overlays said index finger as said second hand inserted in said second golf glove
4 overlays said first hand inserted in said first golf glove while gripping a golf club.

1 7. (previously presented) The golf teaching aid of claim 3, wherein said first and
2 second attachment features are mating elements selected from a group consisting of a

3 hook and loop attachment system, a magnetic attachment system, or a selective,
4 separable adhesive based attachment system.

1 8. (original) The golf teaching aid of claim 5, wherein said third and fourth
2 attachment features are mating elements selected from a group consisting of a hook
3 and loop attachment system, a magnetic attachment system, or a selective, separable
4 adhesive based attachment system.

1 9. (original) The golf teaching aid of claim 3 further comprising a golf club with a
2 modified golf grip having a fifth attachment feature for selectively coupling to said
3 first location feature to align said first hand inserted in said first golf glove when
4 gripping said modified golf grip.

1 10. (currently amended) A method of teaching a golfer how to attain and maintain a
2 correct golf grip on a golf club comprising the steps of:

3 inserting said golfer's first hand into a first golf glove having a first
4 attachment feature on a first glove surface area ~~said first golf glove further and~~ having
5 a lengthwise elongated first location feature ~~on a second glove surface area, said first~~
6 ~~location feature for locating a shaft of said golf club to said second glove surface area~~
7 ~~of said first hand when said golfer grips said golf~~ extending lengthwise from below a
8 base of a little finger of said first hand laterally to a position on the palm surface
9 below a base of a thumb of said first hand;

10 inserting said golfer's second hand into a second golf glove having a second
11 attachment feature on a second glove surface area;

12 placing said first hand inserted in said first golf glove in a correct grip by
13 placing said shaft of said golf club onto said first location feature ~~desired position on~~
14 ~~a grip of a golf club using said first location feature and gripping said golf club;~~ and

15 placing said second hand inserted in said second golf glove over said first
16 hand inserted in said first golf glove such that said first attachment feature couples to
17 said second attachment while gripping said golf club.

1 11. (original) The method of claim 10 further comprising the step of swinging said
2 golf club while keeping said first and second attachment features in contact.

1 12. (original) The method of claim 11 further comprising the step of contacting a
2 golf ball with a surface of the head of said golf club during said swinging step.

1 13. (currently amended) A method of teaching a golfer how to attain and maintain a
2 correct golf grip on a golf club comprising:

3 inserting said golfer's first hand into a first golf glove having a first
4 attachment feature disposed on a first glove surface area ~~said first golf glove further~~
5 ~~and having a~~ lengthwise elongated first location feature ~~on a second glove surface~~
6 ~~area, said first location feature for locating a shaft of said golf club to said second~~
7 ~~glove surface area of said first hand when said golfer grips said golf~~ extending
8 lengthwise from below a base of a little finger of said first hand laterally to a position
9 on the palm surface below a base of a thumb of said first hand;

10 inserting said golfer's second hand into a second golf glove having a second
11 attachment feature on a glove surface area above a palm surface of said second hand
12 inserted in said second golf glove;

13 placing said first hand inserted in said first golf glove in a correct grip by
14 placing said shaft of said golf club onto said first location feature ~~desired position on~~
15 ~~a grip of a golf club using said first location feature and gripping said golf club;~~ and

16 placing said second hand inserted in said second golf glove over said first
17 hand inserted in said first golf glove such that said first attachment feature couples to
18 said second attachment while gripping said golf club.

1 14. (previously presented) The method of claim 13, wherein said desired position on
2 the grip of the golf club is determined by said first location feature on said glove
3 surface area above a palm surface of said first hand inserted into said first golf glove.

1 15. (currently amended) The method of claim 14, wherein said first golf glove has a
2 third attachment feature disposed on a glove surface area above and adjacent to a top
3 surface of said index finger of said first hand when inserted into said first golf glove,

4 said third attachment feature having a first portion extending a lengthwise
5 distance from a first point to a second point on said top surface of said index finger of
6 said first hand and a second portion extending a lengthwise distance from a third
7 point to a fourth point on a side surface of said index finger of said first hand, wherein

8 said first point is adjacent to a junction between said index finger and a middle
9 finger of said first hand, said second point is substantially at a middle knuckle of said
10 index finger of said first hand, said third point is adjacent to said middle finger and
11 adjacent to said junction between said index finger and said middle finger of said first
12 hand, and said fourth point is substantially at said middle knuckle of said index
13 finger.

1 16. (currently amended) The method of claim 15, wherein said second golf glove
2 has a fourth attachment feature disposed on a glove surface area above and adjacent
3 to a palm surface of a little finger of said second hand inserted into said second golf
4 glove,

5 said fourth attachment feature having a first portion extending a lengthwise
6 distance from a first point to a second point on said palm surface of said little finger
7 and a second portion extending a lengthwise distance from a third point to a fourth
8 point on a side surface of said little finger adjacent to said ring finger, wherein

9 said first point adjacent to a junction between said little finger and a ring
10 finger of the second hand, said second point past a middle knuckle but not to a tip
11 area beyond a last knuckle of said little finger, said third point is adjacent to said
12 junction between said little finger and said ring finger of the second hand, and said

13 fourth point is past said middle knuckle but not to said tip area beyond said last
14 knuckle of said little finger.

1 17. (original) The method of claim 16 further comprising the step of coupling said
2 third attachment feature to said fourth attachment feature when said little finger
3 overlays said index finger as said second hand inserted in said second golf glove
4 overlays said first hand inserted in said first golf glove while gripping a golf club.

1 18. (original) The method of claim 13, wherein said first and second attachment
2 features are mating elements selected from a group consisting of a hook and loop
3 attachment system, a magnetic attachment system, or a selective, separable adhesive
4 based attachment system.

1 19. (original) The method of claim 16, wherein said third and fourth attachment
2 features are mating elements selected from a group consisting of a hook and loop
3 attachment system, a magnetic attachment system, or a selective, separable adhesive
4 based attachment system.

1 20. (original) The method of claim 13 further comprising the step of swinging said
2 golf club while keeping said first and second attachment features in contact

1 21. (original) The method of claim 17 further comprising the step of swinging said
2 golf club while keeping said first and second attachment features coupled, said third
3 and fourth attachment features coupled, and said first location feature coupled to a
4 fifth attachment feature on a grip of said golf club.

1 22. (original) The method of claim 21 further comprising the step of contacting a
2 golf ball with a surface of the head of said golf club during said swinging step.
